ALMA MATER TICKETS ON SALE NEXT WEEK

The Union House Committee announced last night that the tickets for the Alma Mater Dance will be placed on sale in the Union on Monday or Tuesday of next week. This dance is the big formal of the year, and has always been the most popular of McGill dances.

Before March 14th, when the dance takes place, there is sure to be a great demand for tickets, and students are advised to obtain them early. Last year there was so much enthusiasm and support for the Alma Mater Dance that the Committee was obliged to issue more tickets, and engaged a second orchestra to play in the lounge room.

This Year's Alma Mater promises to be very successful—there will be good music, pleasing surroundings, and refreshments such as only the Cafeteria can supply.

A negro rector was preaching on the horrors of hell and when he finished the phrase, "And there shall be weeping and gnashing of teeth," there was a sudden burst of emotion in the front pew.

"What's the matter, Myrah?" he asked.

"Dere, sah, I se ahn't got no teeth," Myrah said.

"Teeth will be furnished," he added.—Ex.

Dizz (on telephone): "Hello, Sue! Have you made and arrangements for dinner this evening?"

Susan: "Why, no, I haven't."

Dizz: "Then you will be very hungry by tomorrow, won't you?"

FAMOUS MAN TO LECTURE ON GREECE

A. J. B. Wace at R.V.C. on March 5th.

3000-1100 B.C.

An Archaeologist Who has Done a Great Work

One of the famous men to speak at McGill this year is A. J. B. Wace, M.A., who will address the students next Wednesday. Mr. Wace is a very distinguished archaeological scholar, and has been engaged for a number of years in excavation work in Greece and Thessaly. He will speak about his work on the earliest history of Greece and the Eastern Mediterranean, which covers the period from about 3000 to 1100 B.C. It is rarely that we get such an eminent archaeologist speaking on a subject of which he has complete personal knowledge.

Mr. Wace is a very accomplished speaker, and is on a tour through the United States for the Norton Chair. Several McGill Professors who are his personal friends wrote to him, and were able to arrange for his lecture at the University. He will speak in Montreal on Wednesday, March 5th. In the afternoon he will be at the Women's Art Association, and at 5 o'clock he will address the McGill students at the Royal Victoria College.

The civilization of early Greece and the Eastern Mediterranean has been the particular study of A. J. B. Wace for a number of years. He was in the British School at Athens from 1902 to 1912, and was director of that school from 1914 to 1923. During the Great War he was attached to the Intelligence Department of the British Government in the Balkans. Last year he was appointed to the Norton Chair at the American Archaeological Institute.

Mr. Wace has made most important contributions on this early history, and is one of the leading authorities on his subject. While excavating Beehive tombs at Mycenae, he discovered jewellery and other articles which have thrown into light on the history of early Greece. He has been in Crete, and at Knossos.

(Continued on page 4)

NOMINATIONS TO CLOSE BY NOON

Close Competition is Expected During Coming Elections

The last of the nominations for the coming elections will be handed in to-day at noon and then the real campaigning for votes will begin in earnest. Up to date, of course, nothing definite has been divulged about the nominations but many rumours have been floating around the college.

The most important of the elections will be that of President of the Students' Council. Among the names for this office Dame Rumour mentions Jimmy Packham, now president of the Union House Committee and well known in the Commercial Society; Sid Harris, and Howard O'Hagan, president of the Daily. At a late hour last night a contrary rumour prevailed that both Harris, and O'Hagan have resigned.

The various offices of the Union House Committee will undoubtedly bring forth many nominations, probably from every faculty. Prominent among those suggested for President of this body are Ted Newton and Bob Dingman, while those of Ken Henderson, Philpotts, and Phil Waite are mentioned as possible vice-presidents. The nominations for Secretary are more numerous than for any other office, rumour having it that MacNaughton, Jamelson and MacLean will run.

These elections should go one of the big events in the undergraduate year and every student ought to feel it his duty to come to the polls on Wednesday, March 12th, when the elections are due to take place. Close competition is expected as nearly every faculty will be represented and it is hoped that a very large percentage of votes will be recorded this year than ever.

Kind lady: Boys, boys! You mustn't fight. Don't you know this is Sunday?

Small boy: Aw, shucks, lady, we don't belong to none of them labor unions.—Lily

MEMBERS OF R.V.C.

STAFF VISIT U.S.A.

Miss Hurlbatt and Mlle. Touren at American Colleges

Two members of the R.V.C. staff have recently returned from trips to the United States, Miss Hurlbatt from Chicago, where she attended a Conference of Deans of Women of Universities, Colleges and High Schools; and Mlle. Touren from Wilson College, Chambersburg, Pennsylvania, where she was specially invited by the students in order to help foster an interest in French.

Miss Hurlbatt had the distinction of being the only Canadian who attended the Convention at Chicago, which was the eleventh regular meeting of the National Association of Deans of Women. Some of the meetings were general and some were sectional. Miss Hurlbatt was particularly interested in meeting for the first time educational leaders of the west and middle west. Two of the outstanding gatherings were a joint meeting of the sections at which the topic was "Social Problems and How to Meet Them," and one which dealt with "The University as a Laboratory for After-Graduation Living." The speakers who were of particular note were Frau Schriber, one of the thirty-five women members of the Reische, Berlin, and a member of the delegation of Welsh women now visiting the United States as bearers of a memorial from 300,000 Welsh women to the women of America asking for their co-operation to promote the interests of peace in the world.

Miss Hurlbatt also had the pleasure of meeting Dean Laing again and of being shown through Chicago University by him. One of the most beautiful buildings in connection with the University is the Noyes Hall, a club house for women students, built in the style of an English Tudor manor house and containing among other things, splendid reception rooms, reading rooms, libraries, a theatre, a dining hall on the cafeteria plan, and a large swimming pool.

Mlle. Touren's visit to Wilson College was also a very pleasant one and one of great interest particularly to those concerned with the study of French. Mlle. Touren was surprised to find very keen interest displayed in the French language in view of the comparatively small number of students.

WONDERFUL DANCE HELD BY MEDICALS

Leap Year Ball Among Season's Best

NOVEL DECORATIONS

Music and Refreshments of High Order

The Annual Dance of the Medical Faculty took place last night in all its classical splendour. Descriptions—and this is an annual phrase—are inadequate, although they must suffice. One must go to really see how the sages of the human system make that system enjoy itself. Zeal and zest were key-notes of the evening. It is really true that the mechanic who knows the technical details of his car, can manipulate it better than the driver who doesn't know such details, then surely the same holds true in a medical sense. Certainly the Doctors' Dance last night would have convinced anyone just how thoroughly the Medical course fits one to slide and skid, and change from "low" into "high" to the strains of a modern melody.

The spacious hallways and inviting museum chambers of the Medical Building presented themselves in a new and charming way to the couples as they entered it last night to spend some very crowded hours at the altar of the goddess of pleasure.

The white background of the walls and the ceilings made the red streamers and overgreens a most distinctive and fitting colour scheme, into which blended most beautifully the multi-hues and tints of the ladies' gowns.

Unexpected corners and carefully devised nooks were hidden away by streamers and overgreens. The supper, coming at its appointed hour, was delightfully served by the Union Cafeteria. At the second supper sitting, favours were distributed to the galaxy. The ladies received Indian feather head dresses of dazzling colours and tuneful saxophones, while the men received hussar caps of brilliant shades and potential musical pipes.

Later, showers of vari-coloured balloons rained down upon the merry throng. Indeed, it is safe to say that last night's festivities rank as the

(Continued on page 2)

Choosing a Gift

The best gift is not necessarily the most expensive, for careful choice means more than cost.

A bill-folder, a photo frame, a novelty from Paris or Prague, aptly selected, will surely cause delight.

You need only see the gift at Mappin and Webb's to make your choice simplicity itself.

GIANT SMOKER WILL PRECEDE ELECTIONS

The night of March the eleventh will see a big smoker staged, when candidates for the Union House Committee elections will be introduced to the student body. The purpose of the smoker is that the undergraduates may know something about the men who are winning in the elections.

Each candidate will speak to the students, explaining his platform, so that the student may know who's who in elections. Formerly in too many cases undergraduates have known too little about the men whom they voted for and in many cases cast their ballot for a man because of the fact that he belonged to the same faculty. This excellent idea of a smoker will thus give the voters a good tip on the candidates of the election on the twelfth.

Complete information about the course can be obtained from M. le Professeur J. Calmette, 60, rue Bayard, Toulouse.

DEBATING TEAM WILL VISIT AM. COLLEGES

On Tuesday night the Debating Team leaves for the States. The team is, first of all, going to Bates College where the subject is to be, "Resolved that Socialism has the remedy for the Present Social Unrest." Bates is purported to have a very strong team and the local men will have to put up a good fight. They have been preparing very hard and the debate is sure to be a good one.

This team will also visit Cornell later in the week but the subject has not been announced.

"I'm the greatest woman hater extant. I make the females think I'm a detester of their sex. Then they begin by petting me to 'tame' me."

"And that's just what I'm looking for."

MONTREAL, SATURDAY, MARCH 1, 1924.

A TIMELY MESSAGE

Speaking before the Canadian Club at the Convocation Hall yesterday afternoon, R. L. Calder, Senior Crown Prosecutor, made the following startling statement, "The people of Canada must be taught to appreciate adherence to principle; for there is no consideration higher in Canadian life than the political consideration." He made an earnest plea to McGill undergraduates to develop political sincerity, for, said he, "I think that the Canadian people are thoroughly uninterested in Parliament, and that is the main reason for the failure of democracy."

Mr. Calder's message is a timely one. The prevailing apathy regarding national affairs is deplorable. Many criticisms have been levelled rightfully at the politician, but the elector is not without blame. He refuses to spend the time necessary for informing himself as to the true merit of the candidates from among whom he must make the choice, and even fails to betake himself to the polls to cast his vote. The result of such conduct is inevitable, and is seen everywhere—namely dishonesty.

It would, however, be wrong to say that there are no honest men in politics. The trouble is that many of those who are honest lack sincerity. Their sins are not of commission, but of omission. They will not stand up on the floor of the House and say just what they feel in their heart of hearts to be true.

The words of the Crown Prosecutor were of prime value to McGill students, although but few were there to hear them. Their importance is seen first in the fact that those who are at present taking up courses of studies here will soon be going out into the world and fulfilling the duties of citizens. They should know how to discharge these duties to the best advantage of the nation, and as college graduates they will be expected to have such ability.

In another sense the message is even more appropriate. The annual elections are drawing near, and the undergraduate body will be called upon to choose its executive for the coming year. Men of honesty and sincerity are needed for all the positions, and they must be chosen with the utmost care. This can only be done if every man pledges himself to examine critically the merits of each candidate and to cast his vote for the best man, regardless of any preconceived faculty or "clique" prejudices that he may have. By so doing he will prove himself worthy of his Alma Mater, and will at the same time form the habit of political sincerity, which is invaluable.

THE RELENTLESS MASTER

This issue marks the commencement of the last month of this session in which college activities will occupy a large place in the schedule of the average undergraduate. Soon, all too soon, notices from the secretaries of the various associations in the university will find their way into these columns, bearing tidings of the "last meeting of the year" and of the "annual election of officers."

Since the beginning of the year, Time, that relentless master, has hurried us at well-nigh breakneck speed through the swiftly-passing weeks, and has now brought us to the very threshold of that terrible torture-chamber which every student must enter once or twice a year—the Examination Room. At a date which is, for some, only about six weeks away, we must all betake ourselves to that Room and try to show our instructors what knowledge we have acquired during our year's work.

But everyone who passed through the campus gates enroute to the various buildings on the first day of October last, will not be seen when the classes assemble for the tests. Several of that throng have already left their Alma Mater on account of their failure to toe the mark in the Mid-term examinations. It was with feelings of regret that we saw them depart, but they, in their bitter plight, were nevertheless able to teach us a valuable lesson. In their misfortune we should see our own peril, and should take heed lest we tumble into the same pitfall which engulfed them.

They failed to use time to the best advantage, and discovered their mistake too late. Let us therefore be forewarned, and consequently forearmed. There is yet time to make up for our past shortcomings, on the condition that we commence to do so immediately. And thus we may reach the point where, although Time waits for no man, he will have no terrors for us, because we are prepared.

CONDENSED COMMENT

To-night will witness the final rendering of the decision which will hand over the Beaubien Cup for the first time, either to the University of Montreal or to McGill. This cup has been offered through the generosity of Mr. Beaubien as a trophy emblematic of hockey superiority, the contestants being the two great universities of this city. The series consists of three games, of which this evening's is the last, and at present McGill has a four goal lead over its friendly rivals. The closing intercollegiate hockey match of the season should be keenly contested, however, for the St. Denis St. players are fresh from their Toronto victory, which was no mean achievement. The Red and White has a good chance and unless our sextette is defeated by four goals or over, the Beaubien Cup will rest in the Union for a year. But we not only want the Cup. We want victory to-night as an auspicious closing of a fairly successful hockey season.

NOTICES

SCIENCE UNDERGRADUATES

The annual meeting of the Science Undergraduate Society will take place in Room 33 of the Engineering Building on March 6th.

INDOOR TRACK TEAM

Indoor track practices are being held at the Montreal High Gym. Mondays, Wednesdays, and Fridays at 5:30 p.m. Coach Van Wagner would like to see all men who are interested in track work attend at these practices.

MEDICAL COUNCIL OF CANADA

Word has been received that an examination for the "Dominion License" will be held in Montreal in June 1924. Students of the final year who intend to sit for this examination should write at once to Dr. R. W. Powell, 180 Cooper Street, Ottawa, Ont., giving details of their Provincial registration in order that their names may be put on the list.

This should be done without delay. J. C. Simpson, Secretary, Faculty of Medicine.

ARTS '24 GRAD. PICTURES

Members of Class of Arts '24 are reminded, that according to arrangements, all portraits must be taken before the end of this week. Appointments may be made at Notman's, Phone Up. 4975 or at 225 Peel St., a deposit of \$2.00 to be made.

MACCABAEAN CIRCLE

A meeting of the Maccabean Circle will be held at the Union on Sunday afternoon, March 2nd at 2:30 p.m. Misses Minnie Ratner, Arts '26, Sadie Lazarovitch, Arts '27, and Anne Tarsis, B.A., Med. '24, will give a symposium on "The Jew in English Literature." Miss Francis Levittoff, Arts '26, will give a recitation and Miss Sadie Shapiro will deliver a piano solo. The debaters for the McGill-Toronto Menorah debate will be chosen.

INTERFACULTY BASEBALL SCHEDULE

Mar. 3rd
5-6. Medicine vs. Commerce.
Mar. 7th
5-6. Commerce vs. Dentistry.

S.C.A. NOMINATIONS

Nominations are hereby called for the positions of President and ten members of the S.C.A. Board of Directors for 1924-25.

Nominations signed by five members will be received at the Office at Strathcona Hall until March 4th.

Elections will be held at the Annual Meeting on March 13th at 7:30 o'clock.

C. T. TEAKLE.

Rec. Sec.

FENCING CLUB

A collection of broken foils are at present in the hands of the Fencing Club manager. Ample warning is being given to those who can prove ownership and come and claim their possessions. If by next week the owners do not show up these will be disposed of and the proceeds turned into the club treasury.

SNOOKER TOURNAMENT

The Snooker Tournament is now under way. The draw for the first round is as follows:

F. McCulloch vs. E. L. Bullion.
H. A. Cohen vs. F. L. Fisher.
C. Rosenheim vs. P. Wickham.
R. Whiting vs. G. Cloutier.

Each match consists of the best two of three games.

Will the above contestants please see Mr. Wilson in the billiard room at once and give him their phone numbers, so that matches can be arranged, and the tournament can be run off in good order?

R. V. C. HOCKEY PICTURES

All those wishing pictures of the Hockey Team please sign the list on the Athletic Notice Board as soon as possible.

HOW LOW IS UP?

A member of the New York City Canadian Club recently made a flying trip to Canada. After completing his business, he went over to the station to see about his reservation.

"Let me have sleeping accommodation to New York," he said to the man at the window.

"For a single passenger?"

"No," he replied, "I'm married, but I'm not taking anybody with me. A single shelf will answer."

"Upper or lower?" asked the agent.

"You understand, of course, the lower is higher than the upper. The higher price is for the lower berth. If you want it lower you'll have to go higher. We sell the upper lower than the lower. In other words the higher the lower."

Athletic fans at McGill are rejoicing this morning on account of the excellent performances given yesterday by the Red and White skiers and snowshoers. The local men captured everything except one first place and are now only two and a half points behind the Dartmouth team. The final events are being conducted today and from all indications McGill should be able to retain the championship.

An interesting incident in yesterday's portion of the winter carnival was the appearance of a student from Loyola. It is hoped that this is a sign of more entries to come in the future from such colleges as Loyola, the University of Montreal and Bishop's.

R. V. C. '24 GRADUATION PICTURES

All senior pictures must be taken on or before Tuesday, March 5. Arrangements may be made at Notman's, Phone Uptown-4975.

R. V. C. '24

Those who wish to get class pins or rings please sign the notice in the Arts Building or at R. V. C. immediately.

SCIENCE '24

Will the following men please turn out at the Campus rink at 12 noon today for a game with Commerce '25: McGill, McDonald, Gillett, Fanburn, Langlot, McDonald, Gillett, Fanburn.

GYMNASTIC CLUB

The following men constituting the team to compete at Westmount Y. M. C. A., will please appear at the "Y" at 7:30 p.m. Saturday, Delahay, Conakilo, McKee, Ambrose, Bremner, Bourne, Perry, Decker, Baxter, Gordon N. R., Keene.

Complete white uniform with long pants to be worn.

CITY LEAGUE INDOOR BASEBALL

McGill Reds vs. MacDonald at MacDonald. Will the following be at Bonaventure Station at 1:20 p.m. Abramovitch, Bronson, Nairn, Walker, Chamberlain, Grassick, Lauthier, Kendrick, Forrest.

Bring ducks or flannels, sweaters will be supplied.

INTERMEDIATE 'B' BASKETBALL

Will all men having jerseys please return them to Major Forbes' office before 2:00 p.m. Monday. Please see that each jersey has a player's name securely attached.

Note:—Jerseys for Junior game with Engineers will be re-issued for game.

JUNIOR 'B' BASKETBALL

All men not having paid for their pictures please see manager as soon as possible.

C. O. T. C. ORDERS

Special order by Lt. Col. R. R. Thompson, M.C. O.C., McGill C. O. T. C. A lecture for all candidates for certificates will be given in Room 32 Engineering Building on Tuesday, March 4th at 5:15 p.m. by Major W. Neilson. The subject being supplies, and payment of troops in the field.

F. F. Lawrence, Captain and Adjutant, McGill Contingent.

C. O. T. C.

McGill Theatre Night is only twenty-eight days away and an orchestra is needed to play in the pit. Those wishing to take part please report at the Union Music Room for first practice, Monday at 5 p.m. Music Light and practices short—no excuse to stay away. Those who have music stands please bring them along.

ELECTRICAL CLUB

The McGill Electrical Club will hold its Annual Banquet on Wednesday, March 13th at the Queen's Hotel. Further announcements later.

SOCIETE FRANCAISE

There will be a meeting of the Executive on Monday at 1:30 in the Faculty Room, R. V. C.

HISTORICAL CLUB

The ninth meeting of the Historical Club has been postponed until Tuesday evening, March 11th, owing to the fact that the host and one of the speakers will be out of town next week.

Subject and Speakers:—Christianity: Present-day Tendencies, A. O. Lloyd; Islam, past present and future: R. C. Tennant.

LOST

Medium sized Waterman pen in the Engineering or Chemistry Buildings. Finder please return to janitor of Engineering Building and oblige owner.

SECOND PROGRAM BY RADIO CLUB

Talent Supplied by the McGill Conservatorium

Thursday evening McGill Radio Association gave its second broadcasting program from their station 10 A. U.

The talent was supplied by the McGill Conservatorium. According to the number of phone calls after the departure from the station, the program was very enthusiastically received.

The McGill Radio Association intends to put on Weekly broadcasts if the material is available.

This is the program:

"Tommy Lad" by Margelson, sung by Mr. H. Gillingham, Tenor.

"If Winter Comes" by Eleanor, sung by Coleridge Taylor.

"Sigh No More Ladies" by Aiken. Accompanied at the piano by R. J. Cameron Taylor.

Mr. Berle rendered "Canzonetta" by D'Ambrasia.

"Sonata in G Minor Orientale" by Caesar Cui.

"Rondino" by Fritz Kreisler, accompanied by R. J. Cameron Taylor at piano.

Miss Francis James sang "What's in the Air Today" by Eden.

"Morning" by Oley Speaks.

"Valley of Laughter" by Sanderson.

"Leaves and the Wind" by Leonie, accompanied also by R. J. Cameron Taylor.

R. J. Cameron Taylor himself at the piano rendered the "Bullade in G Minor" by Chopin.

"Etude in A flat Opera 10 No. 10" by Chopin.

Student Verse

"AS I WENT A-WALKING."

As I went a-walking,
A-walking down the street,
I met a little fairy,
So sad, but oh, so sweet.

"Now tell me, little fairy,
Why are you sad to-day?
The air is full of sunbeams,
Agog to have you play!"

"Alas! Alas! I cannot play."
The little creature sighed,
"My heart is very heavy,
My sorrow I can't hide."

"ur Queen of love and happiness,
Is seeking love anew,
Her lamp of love is flickering out,
For smiles are now so few."

Mortals now just scoff and sneer,
They seldom smile and sing,
And lo! that makes the world go round,
They say's a useless thing."

The dainty fairy hung her head,
Cried I, "I'll smile for you."
Her eyes lit up, she danced and sang,
"That's all we want"—then flew.

—Jack o'Lantern.

WONDERFUL DANCE HELD BY MEDICALS

(Continued from Page 1)

best in this college session, and also better than any the past has seen for many years. The programme was designed by H. G. Hoek of Med. '24 and included twelve dances and three extras, besides three supper extras.

The dance music was extremely good, and it without doubt must still be haunting the minds of some of its erstwhile slaves. The hostesses were Lady Currie, Mrs. C. F. Martin, Mrs. Edward Archibald, Mrs. T. C. Simpson and Miss Hurlbalt. Among those present were

Misses:—T. Paddon, Mr. Currie, M. Adams, M. Martin, Elaine Gillson, Billie Russell, Lena Kier, Lucile Cooper, F. Johnstone, Phyllis Woolcombe, Ethyle M. Harris (Ottawa), B. Blinn, N. Hinton, Mrs. W. D. Farmer, Ethel Hersey, Blinn, Gladys Thompson, Grace Paterson, Marjorie Shilcock, Grace Paterson, Marjorie Thompson, Ellen Williams, M. Marcus, J. Pillwin, Marion Ingersoll, Isabel Eager, Dorothy Hutchison, Harriet Van Walt, Helen Johnstone, Winifred Cooke, Dorothy Campbell, Katherine Dennis, W. M. Goodwin, M. Hammond, B. Lang, E. Bennett, Nan Argue, Carmel Faley, Doris Clarke, Doris Daniels, Marion Ballo, Isabelle Kieley, Doris Weir, K. McMillan, Hazeldean Herron, Lila Argue, Mary Fraser, Muriel Braden, Georgina Casdale, Florence Crang, May Russell, Dorothy Kenrick, Dorothy Russell, Gerald Savage, W. McGoun, O. Pritchard, T. W. Logan, K. Owens, C. Hallisey, J. Campbell, Eve Walsh, E. Henderson, E. Powell, A. Carter, K. Masson, P. Prouse, A. G. MacDonald, B. Anderson, O. Anthes, Mrs. Pinkey, M. McNaughton, E. Dubold, M. Rothman, H. M. Gillis, K. Matheson, O'Hagan, G. Taylor, C. Donald, M. Matheson, J. Plumtre, E. Watkins, E. Robbins, H. E. Bagley, I. Beattie, J. Fairbairn, C. C. Stewart, H. LaBerge, R. Murtage, K. Coun (Ottawa), D. Morrison, E. Stewart, D. Blinn, G. McKie, G. Vass, St. Kilda, McLean, C. Clark, N. Strong, Dr. Whitnall, Dr. Byers.

The following gentlemen were present:—

R. G. Hayes, J. H. Lawan, W. W. Howard, C. G. Glendinning, H. K. Ingersoll, C. S. Thompson, A. V. Forrester, J. O. Fraser, Don. S. Fraser, H. C. Alward, H. B. Bustin, C. Alex. McIntosh, J. A. Ferguson, J. McGuire, G. M. Conner, G. F. Guy, Jack Lynch, H. Graham Ross, Dr. Fraser-Murray, G. V. Matthews, L. G. M. Lauchlin, F. B. Chalmers, W. M. Pfeiffer, R. E. Gillson, M. A. Kelly, Dr. J. C. Arker, T. Fisher, G. W. Abbott-Smith, Sydney L. Harris, Ralph P. Wood, Alfred E. Kuntz, W. D. Farmer, Dr. Davis, Dr. Caldwell, Robert H. Smith, H. L. Simpson, J. C. Gage, F. S. Dorrance.

In a restaurant not far from the campus, a conversation was overheard several days ago.

Henry: I wonder how long it takes to become educated, George. I have been attending the University for three years now, yet there are times when I doubt if I really know or understand anything!

George: But your marks are certainly good.

Henry: Outside evidences are rarely reliable. A man with a fatal heart disease gnawing at his life appears hale and robust. I am beginning to feel more ignorant every day.

George: I can't say that you look smart, Hank, but still my general opinion has been that you are more than mediocre in an intellectual way.

Henry: It's queer, George. I go to class, study, ponder, write thorough examination papers and reports, listen to professors, and sometimes wonder at them. I enjoy Shakespeare and appreciate Phidias and Frazeleas, and have accumulated a fairly large number of so-called honor points, but Lord!—I don't feel co-ordinated or complete. I feel more like a thimble trying, like Mrs. Parkington, to ball out the Atlantic, like a penny match-box endeavoring to contain great pine trees. I am crammed to the rim with this fact and that, but I don't know what I know. On Tuesday I am a heretic, Wednesday an agnostic.

How many other students feel the same way as Henry does?—H. O. O.—In the Minnesota Daily.

"Madam, with this new process I can take ten years off your age."

"No, I think I'll remain an adult."

Radio Week

THE McGill Radio Club has, through the courtesy of its President, arranged to install a receiving set and loud-speaker and furnish a Radio Concert for McGill Students on Tuesday and Thursday evenings next week, between 10.00 p.m. and midnight in

The Union Cafeteria

WHILE this is a temporary arrangement, it is hoped that we may be able to co-operate more often in the future with the Radio Club. Of course, I shall see that the "eats" are sufficient and satisfactory. The introduction of Radio Concerts is an attempt to justify the slogan of "nothing if not up to date."

Pierre

DARTMOUTH'S LEAD REDUCED BY SEVENTEEN POINTS IN YESTERDAY'S BIG EVENTS

Cross-Country Ski and Snowshoe Races—Men From Dartmouth, Williams, Middlebury and Loyola Competing—Conditions Rather Unfavourable—Strong Wind and Snow Packed Hard—Ski Tests Also Held—All Showed up Well—McGill Men Especially

Yesterday afternoon in the teeth of a forty-mile gale, representatives of five American and Canadian colleges competed in the first three scheduled events of the McGill Winter Carnival. The McGill Ski and Snow-shoe Club had for their opponents four teams from the colleges of Dartmouth, Williams, Middlebury and Loyola and succeeded in pulling up a formidable lead in points. The points to date are: McGill 37; Dartmouth 58 1-2. The Dartmouth team brought up with them a commanding lead of 19 1-2 points but yesterday afternoon this advantage was whittled down to a small 2 1-2 point margin.

In the cross-country ski race three McGill men gained points for their team while two others finished fifth and sixth. The Red and White representatives were at the top of the list in the ski proficiency, which resulted in swelling the total by nine points more. The snow-shoers added four more when the two McGill men entered, finished second and third.

A furious west wind greeted the contestants in the carnival when they lined up at the clubhouse of the Montreal Ski Club for the proficiency test. It was intended that the test be held in front of the club house but the fury of the wind necessitated the moving of the site to the Cross-roads. calmer conditions prevailed. The first test was in making a left Christiania and the second and more difficult was a right Christiania and a left Telemark. The performances were judged by Mr. G. W. Barch and Mr. P. McKinnon, who because of their experience gave very good decisions and ably conducted the test.

Sherrard of McGill topped the list in the proficiency test with a total of 55 points while two of his team-mates, Gravel and Leslie, tied for second place with 45 1-2 points each. Brown of Williams gave a good performance and came third with 44 points. In this test the McGill team made a clean sweep and were awarded the total nine points given for ski proficiency. The following is the standing and scores in the proficiency contest:

	Pts.
1—Sherrard, McGill	55
2—Gravel and Leslie, McGill	45 1/2
3—Brown, Williams	44
4—Frost, Dartmouth	42
5—Costigan, McGill	40
6—Beaubien, Loyola	37
7—Stewart, Dartmouth	36
8—Peck, Middlebury	18

The scene then changed to the look-out where the course of the Cross-country Snow-shoe race started and finished. Four teams of two men each lined up for this event which took place over a course of two miles. The runners found the course very difficult owing to the extreme hardness of the snow and Blake the captain of the Dartmouth team had the misfortune to break both his snowshoes. His team-mate Doe came first in the race making the two miles of the difficult course in the good time of 11 minutes and two seconds. He was followed by Grimson of McGill whose time was 11 minutes and 35 seconds, while Duncan Anderson came third in 11 minutes and 42 seconds. Driscoll of Williams finished fourth. As a result of this race Dartmouth gained five points by Doe's first place while Grimson and Anderson together contributed four points to McGill's score.

The following is the place and time made by the different entries:—
1—Doe, Dartmouth, 11 min. 2 4-5 sec.
2—Grimson, McGill, 11 35 2-5 sec.
3—Anderson, McGill, 11 42 4-5 sec.
4—Driscoll, Williams, 12 min.
5—Brewster, Williams, 12 min. 10 2-5 sec.
6—Tully, Middlebury, 15 min. 33 2-5 sec.
7—Blake, broke both snowshoes.

The third and last event of the afternoon was the Cross-country Ski race in which ten skiers took part. The course of about eight miles began at the clubhouse of the Montreal Ski Club, and ran over the mountain and down McTavish Street to the Campus. The winners of this race were three McGill men Brown, Wade, and Elliott, who finished in the order named. Quite a large crowd of spectators gathered along the course on McTavish Street and at the Campus and enthusiastically cheered as the Red and White contestants romped home after their eight mile run. Nine more points were added to the total of the Red and White team as a result of their annexing the first three places in the race.

Below is given the time of each of the entries:—
1—Brown, McGill, 1 hr. 27 2-5 sec.
2—Wade, McGill, 1 hr. 1 min. 45 sec.
3—Elliott, McGill, 1 hr. 3 min. 25 4-5 sec.
4—Beaubien, Loyola, 1 hr. 5 min. 51 5-5 sec.
5—Rutherford, McGill, 1 hr. 6 min. 50 sec.
6—Fry, McGill, 1 hr. 7 min. 17 sec.
7—Platt, Williams, 1 hr. 7 min. 45 2-5 sec.
8—Conant, Dartmouth, 1 hr. 8 min. 51 5-5 sec.
9—Emmerson, Dartmouth, 1 hr. 14 min. 55 2-5 sec.
10—Smith, Dartmouth, 1 hr. 19 min. 45 2-5 sec.

Glancing back at the results of the Dartmouth Carnival of a fortnight ago it is pleasant to note that McGill's fortune was reversed in yesterday's performances. In the Cross-country ski race Bob Wade was the only Red and White skier to finish in the winner points column, although he was closely followed by Tom Brown who finished fourth. Wade by coming third gained one point for his team while today the McGill skiers took all of the nine possible points. Edson of Dartmouth finished first and was followed by Tom Farwell his team-mate in the Cross-country ski race at Dartmouth. Two weeks ago the McGill men were unable to win a point in the Cross-country Snow-shoe race. Peasley of New Hampshire State University won this event when he beat Doe and Blake of Dartmouth.

The men who starred in the ski proficiency test were mostly those who had also gained honours in Dartmouth two weeks ago. Sherrard earned him first place also won the honours in the Dartmouth meet. Leslie who tied Gravel for second place was third in the test of two weeks ago. Stewart of Dartmouth who made second place in that test was placed seventh yesterday.

This morning at twelve o'clock three more events will take place, those of the ski dash, the snow-shoe dash and the relay race. The McGill entries in the ski dash of 150 yards are Wade, Burke, Browne and Costigan. The Dartmouth team will be chosen from the following men, Edson, Farwell, Frost, Stewart, Mann and Smith.

In the Snow-shoe dash, which is also a 150 yard dash, the McGill team will be composed of Mitchell, Anderson and Hurd, while Blake and Doe will in all probability be chosen to represent Dartmouth. The McGill relay team of four men will be composed of the same men who will take part in the dashes while the Dartmouth, Williams and Middlebury entries will be chosen from the men who took part in yesterday's events. The ski-jumping contest will be staged on Cote des Neiges Hill at three o'clock in which all yesterday's performers will take part. In addition, there will be two other Dartmouth entries, Edson and Farwell, while two other McGill men will also enter namely Starke and Lehan.

It is expected that it will again be waved as a party banner and as a red rag, both literally and figuratively by the former opposition party. Russia has been in fact a very live issue ever since the famous trial of the Russian Arch-criminal, Ivan Bismovitch and his counter-charges filled with scandal upon individual members of His Majesty's Government, last year. The former opposition party, under the leadership of Howard O'Hagan, who will be the next Prime Minister, now constitute the government. It's programme in is not yet not yet completed but it is expected to be one which will arouse public interest to a high pitch. It is even hinted elsewhere that scandal is in the air, and certainly the next session one of the stormiest for a very long time Howard O'Hagan, ex - premier, Bert Wells, Baleshaw, and Edol, amongst others, will be present, and it is hoped that there will be a very large attendance at this the last session of the University Council, and the end of the year.

The next Mock Parliament which has had to be postponed from next Thursday, March 6th to Monday, March 17th on account of a City League game, will be the last session of this college year's Parliament. It is unfortunate that postponement has to occur, but it will give the political parties more time to gather their forces for the battle. It is evident, indeed, in University political circles that all parties are re-organizing and preparing for a last clash of words and a last bid for power.

It will be remembered that at the last session, the Government was defeated by a narrow margin upon a vote to recognize the present Soviet Government of Russia. Russia has not yet become a subject in which there large interest at this the last session of the University Council, and the end of the year.

PHYSICAL ED TEAMS WIN AT BASKETBALL

Y.W.C.A. Overwhelmed by Superior Play
RETURN MATCHES

First Team Wins by Score 58-29, Second Team 33-11

Two return basketball matches were played in the Montreal High School Gymnasium between the Y.W.C.A. and M.S.P.E. first and second teams. Both Physical Ed teams won. The first team doubled the points on their opponents, 58-29, while the second team emerged on the long end of a 33-11 score.

First Game
Right from the start the ball was rushed to the M.S.P.E. basket and a goal was scored by J. McCaw. The play continued under the M.S.P.E. basket and another goal was scored. The ball was then passed to H. Field who scored the first goal for the school. The play from this point was very even, though the M.S.P.E. team had the advantage over their opponents in quick passing, and good shooting. H. Tatlow delighted the spectators with her long distance shots and B. Field scored five goals in rapid succession.

At times the play was strenuous. The period ended with a double foul, both teams scoring.
Half-time score: 23-14 in favor of M.S.P.E.

Second Period
The ball was carried at once to the Y.W. basket on the resumption of play and a goal scored. After considerable loose play Nan McGargart, who replaced H. Tatlow, scored the first goal for M.S.P.E. M. Robertson replaced E. Perry as side centre. During this period the play was slow and uninteresting, the M.S.P.E. team first scoring two or three goals and the Y.W. one.

Both teams showed a little combination and passing and towards the end the play became faster. The game ended with a score of 58-29 for the M.S.P.E. team.

Line-up:
Y.W.C.A. M.S.P.E.
Forwards
J. McCaw H. Tatlow
D. Booth B. Field
Centres
G. Donnelly D. Russell
J. McRobie E. Perry
Guards
E. Rorke Z. Slack
N. Rorke M. Pulkinghorn

Second Game
M. Smith scored right from the throw-up after the whistle was blown. During the whole period the play was mostly under the M.S.P.E. basket due to the good passing and combination of the guards and centres. R. Copland played an especially good game, passing and covering quickly. Y.W. scored a free shot and with this encouragement they netted three more baskets, but their opponents were too strong for them and the period ended with a score of 20-7 for M.S.P.E.

Second Period
M.S.P.E. scored a point on a double foul. The play during this period was sloppy, with considerable fumbling of the ball on the part of both teams. Plumtree who replaced R. Copland during this period, played up well. A. Crang also turned in a good game. Just before the period ended, A. Roy made a goal, trebling the score for M.S.P.E. 33-11. During both games Miss Haslam and Miss Harvey refereed.

Line-up:
Y.W.C.A. M.S.P.E.
Forwards
Mrs. Cooney A. Roy
M. Shearer M. Smith
Centres
E. Lawrence E. Godfrey
J. Abraham H. Copland
Guards
E. Thomson M. Anglin
M. Pick T. Crang

MEMBERS OF R.V.C. STAFF VISIT U.S.A.
(Continued from Page 1)

French people in Chambersburg and the distinctly American atmosphere of the College. Of the three members of the French department only one is French. An extremely active French Club exists at the college.

Mlle. Touren was the second outside speaker to be invited there in the interests of French, the head of the French department at Harvard having been there just before her. During her visit there Mlle. Touren gave two public speeches and two to the French Club who will survive. One of the general speeches on was "Types of French People," and doubtless abounded with Mlle. Touren's charming laimour. The others were on literary topics. French plays were also presented and a French banquet were given. Undoubtedly Mlle. Touren's visit served to awaken even greater enthusiasm for French at Wilson College and to stimulate the French Club to greater efforts as well as to interest the students of Wilson College in McGill.

VARSIITY AND QUEEN'S PLAY AT M.A.A.A.

Brilliant Line-up on Both Sides
MANLEY REFEREE

Intercollegiate Basketball Final to be Played off To-day

The intercollegiate senior basketball championship will be decided to-day when Haslam's Presbyterians from Queen's will battle with Caple's Blue and White Toronto squad at the M. A. A. A. The respective chances of the two teams for carrying off the title seem about even. Both have been playing fine basketball and can be depended upon to put up a terrific fight through two full periods.

Only last Saturday McGill students saw the speed and combination of the Queen's men, and above all the wonderful work of the Tri-colour's great trio, Hunter, Haslam and Jones. How these men are going to show up against the fast shooting Varsity forwards, Laydman and "Biff" Potter, and the stellar guards, Bell and Caple, remains to be seen.

When Toronto, in the first two games of the year, overcame both McGill and Queen's, and again triumphed over McGill at Toronto, the title seemed to be assured for the Blue and White. But the Tri-colour finished strong, beating Varsity in Kingston and twice defeating McGill. This brought them into first place in the league standing alongside of Toronto and necessitated a play-off.

That this play-off for the championship is being held in Montreal is the result of the new ruling made by the Intercollegiate basketball committee at their meeting in the Union last Saturday. At first it had been intended that the ruling regarding the play-off or ties on the third team's floor should go into effect next season. However it was finally decided to enforce it immediately and take a definite action which would serve as a precedent for future play-offs.

To-day's game starts at three-thirty. There is little to choose between the two teams. Both have speed and combination, while on the line-up of each are some brilliant individual players. They should be playing at their best this afternoon for both squads are going in determined to carry off the Intercollegiate trophy now resting with McGill.

Mr. Manley who is renowned for his ability and impartiality will referee. Aspler's orchestra has been engaged for the afternoon and will see to it that things are kept livened up before the contest and at half-time.

Tickets will be at regular student rates and can be obtained at the Union or at the M. A. A. A. Queen's will probably start the same team as last week, Hunter at centre, Haslam and Jones as forwards and Hannon and Thomas on defence. Varsity's forwards will likely be Laydman and Potter with Hutchinson at centre and Bell and Caple, guards.

A MEDICAL PIONEER

Louis Pasteur, "a great Frenchman, a great scientist and a great medical pioneer," he bequeathes to mankind the example of his life and the boon of his discoveries. To-day, when we are in the midst of the canonization of so many of our eminent medical men, the Queen's Journal in a very timely article, directs our attention to one of the pioneers of the science, the Christopher Columbus in the field of inoculation—Louis Pasteur. Throughout his useful life he seems to have nicely balanced science and religion, giving to each their legitimate spheres.

"Science, as he knew it, only recognized facts and phenomena which it could demonstrate. The subject of primary causes was not included among these." The great scientist was paid to rest in the Pasteur Institute, that great beehive of research. Mr. Alfred Hayes has written the following sonnet commemorating the burial: "No cypress-shaded church-yard nor the gloom Of haunted cloisters doth immortalize The dust of him whose patience proved more wise To save, than Death to slay. The busy loom Glancing with silk, the teeming herd, the bloom Of purpling vineyards, and the grateful eyes Of souls deprived at death's most dread assize Shall make eternal gladness round his tomb. Not 'mid the dead shall he be laid asleep Who wareth still with death triumphant and strife. Who sowed the good that centuries shall reap And took its terror from the healer's knife— Defender of the living, he shall keep His slumber in the arena of life."

BASKETBALL TEAM PLAYS AT ST. JOHN

Senior Regulars Will Leave To-morrow Night
MEET TROJANS

St. John Men are Probably Best in the Maritimes

The Senior basketball team leaves tomorrow night for St. John, where the McGill men go up against the Trojans Athletic Club quintette on Monday and Tuesday. The five Red and White regulars will make the trip while Boucher will go as substitute.

The Trojans are a very strong team and have practically clinched the Senior championship of the Maritimes. They have just returned home from a trip through Nova Scotia on which they won all their games. Wilson who is probably their leading forward is a former Dalhousie University star. Malcolm and Kerr played on last year's squad which was beaten by the Red and White last season. Malcolm is a big man and a wonderful shot while Kerr on defence is an extremely hard man to get past. Hollies, the other regular guard is a new player who has been showing good form.

Last year the university basketball team made a triumphant invasion down east at the close of their regular season. This year's squad is determined to repeat the successes of their predecessors. Lesly Mendelsohn, the fast little forward, will lead the Red and White attack against the New Brunswickers, while Philpott, the great basket-getter, will be alongside him. "Bozo" Mannon who played the game of his life last Saturday, starts at centre. The McGill guards will be the fast hard-working defensive pair, Harry Blumenstein and Stanley Quackenbush.

The two games in the lower provinces may be the last contests the McGill men play this season. There is a strong possibility, however, of their going into action once more in Montreal, as a game with the M.A.A.A. may be played. No definite arrangements have been made regarding this, the final decision really depending upon how the players themselves feel about it. It is quite likely, though, that the McGill men will be willing to meet the Peel St. quintette, so that whether or not the game is to be played will probably rest entirely with the M.A.A.A.

Following are the probable line-ups: Trojans A. C. McGill

	McGill
Forwards	Urquhart Mendelsohn Wilson Wilson
Centre	Malcolm Mannon
Guards	Kerr Blumenstein Hollies Quackenbush
Subs.	Boucher

He: "And what do you think is God's most perfect blessing?"
She (coolly): "Why, man, of course. And what do you think it is?"
He: "I thoroughly agree with you."
—DePaow.

Brown had just been introduced to a man who stuttered.
"Did you ever attend a school for stammering?"
"No, I just picked it up."—Ex.

GYMNASTIC CLUB MEET WESTMOUNT

Last Open Competition Before Intercollegiate
AT Y.M.C.A.

Winners of Wicksteed Prizes to be in Action

The second Gym competition of the season is to take place to-night at 7.30 in the Westmount Y.M.C.A. gymnasium when the McGill men meet the Westmount "Y." The Wicksteed competition held last Friday and Saturday gave the men a chance to show their wares and the result was very satisfactory to all concerned. The men showed good form in all the events and if they work as well to-night the meet should be McGill's.

The squad was very much weakened by the loss of Gill who placed fourth in the high totals of the Wicksteed competition. While practising a few days ago he fell from the high bar and hurt his arm which necessitates his withdrawing from the meet to-night.

According to a notice given in these columns, McKyes is to turn out with the team. In the Wicksteed competition McKyes strained his arm badly and was not expected to take part for a few weeks. His addition to the team will be invaluable.

Of the others Delahay, Consiglio, and Ambrose are outstanding. Delahay has shown remarkable form on the bars and was on the McGill team last year. On the bars last Friday night Delahay scored 94 out of a possible 100 points, which is certainly a remarkable showing. Franco Consiglio who also took part in the intercollegiate meet last year and won the Wicksteed medal for the intermediate years with the highest aggregate score of the meet, will also be on hand. Consiglio is a very good gymnast and is bound to show up well. His work on the mats, especially is worth while seeing.

The winner of the Senior Years last Saturday, Ambrose, is another of the Red and White hopes. Ambrose is an all-round man who, although he stars at no particular event, is good in everything. It is this kind of man who is invaluable to a gymnastic team. Keene, who was unable to take part in the Wicksteed, will

be on hand to-night and should make a good showing. Taking everything into consideration, it will be a pretty strong team that takes the floor to-night and Coach Finlay should have nothing to complain of if his proteges keep up their usual form.

The meet to-night will be the last outside competition before the Intercollegiate on the 8th of this month at the Central "Y." The team for the Intercollegiate will be picked from the best men in to-night's events, taking their showing in the Wicksteed into consideration also.

The following is the line-up for to-night: Delahay, Consiglio, McKyes, Ambrose, Bremner, Bourne, Perry, Becker, Baxter, N. K. Gordon and Keene.

th a very late hour. Has not your mother said something to you about this habit of his?"
Mabel: "Yes, dad. Mother says men haven't altered a bit."—Ex.

First Burglar: "What did ye git in that room?"
Second Burglar: "Nothin'! A college student lives there."
First Burglar: "Did yer lose anythin'?"—The Torch

INSPIRING ADDRESS BY PROMINENT LAWYER ON POLITICAL SINCERITY

Those few who turned out yesterday afternoon at the Canadian Club were treated to one of the best addresses this season by Mr. R. L. Calder K.C., Senior Crown Prosecutor of Montreal. Mr. Calder's subject was "Political Sincerity" and all those who heard him could not help feeling that this doctrine ought to be universally dealt with.

Seeing that there were so few present and saying that he always felt more at home on the same level as his audience, Mr. Calder spoke from the floor instead of from the platform. He deplored the fact, which cannot be denied, that democracy has failed. It is indeed depressing that the catalogue of every library should include such books as Godkin's "Unforeseen Problems of Democracy." Democracy is perfect in theory, but in practice it has not been successful. It is the duty of all to examine parliamentary government, to see if they can find a solution to the present difficulties.

Since popular government began, barely two centuries have elapsed. The people had their first say in the time of George I, but we must realize that modern parliamentary government is only in its infancy, for it was only five years ago, that universal suffrage was established in England. A member of parliament represents a majority this being the only conceivable method of popular representation. A man, if he wishes to bring about a reform, must first obtain favourable public opinion and, possessed with this, he allies himself to some party, and is elected to parliament. He is bound to support the reforms for which he was elected, for, if he does not, he will inevitably be punished by an adverse vote at the next election.

This theory, however, does not work because the method of choice is wrong. The people of Canada are not interested in politics, they do not interest themselves in political debates, there are swayed by trivial and unimportant catch or preconceived decision. There things. The decision at elections is a few electors who think of political problems and analyse them to any extent. The effect of all these faults has been the failure of democracy.

In order to carry on the life of a state, every man must take his part, however small this part may be. If this duty is neglected, the first seed of destruction is sown. But many neglect this duty and it is sad to say that politicians take advantage of his. Bribery and corruption result. As we all know, votes are stolen, and it may be rightly said that he who steals the vote is a better citizen than

the man that does not exercise his vote, as the former is taking at least, a real interest in the government of his country.

Fascism and Bolshevism are the direct results of this. Some say that we need the authoritative kind of government with a dictator at its head while others believe in government by the representatives of the various trades, which would eventually bring us back to the early state where tribes were the unit of civil life. Both are the death and poison of parliamentary government.

The speaker stated that he preferred fixed parties with a deal of tradition behind them but, the elected only, should be divided into parties, this being necessary for a stable government. This should not be so in the case of the elector, but it is actually what happens. As it is, a man is born a Conservative, a Liberal or a Progressive, while a change of party is considered almost a disgrace. This state of affairs may be likened to that of a jurymen that enters the box fully determined to pronounce the accused guilty no matter what anybody is able to prove to the contrary. This is the outstanding cause of the modern democratic government. This is emphasized by the well-known fact that political parties are scared by independent voters and any increase in their ranks will tend to increase the efficiency of the government.

The three-party system, now functioning in England and Canada, is very similar to the three-cornered duel in "Midshipman Easy." Each party is afraid to face a general election. Hence there is no progress.

People must be educated to adherence to principle. The state of affairs shows just the opposite, however. In Canada the people are allowing their votes to be captured by everything but the right bait. Lavish amusement and feigned interest, on the part of the politician, attract the public while their political merits remain unquestioned.

In concluding, Mr. Calder said that he believed that it was not the natural resources of Sparta and Rome that made them so powerful, it was the character and patriotism of their citizens, combined with their excellent government, that gave them such outstanding positions in the history of the world. Trained university men must strive for good government, elected by intelligent people, voting with sincerity.

The speaker was vigorously applauded and Lawrence Tombs proposed the vote of thanks, which was seconded by A. L. Morris.

FINAL GAME IN BEAUBIEN CUP SERIES

U. of M. Clash With Red and White at Arena

McGILL LEAD

Both Teams Show Good Hockey in Late Games

One of the most important hockey games of the season is due to take place to-night in the Mount Royal Arena at 8.15 o'clock, when the winner of the Beaubien Cup will be decided. As everyone knows this cup is presented for competition between McGill University and the University of Montreal. The cup is awarded to the team winning the best of three games, of which the game to-night is the third.

The first time these teams met the game was a draw, the score being four all after three periods overtime of gruelling play. This game was the closest of the season and was a fairly good exhibition of hockey. In the second game a vastly improved McGill team overcame the U. of M. sextette to the tune of five to one, thus giving them a good lead for the cup. If the Red and White men win or draw in the game to-night, the trophy will come to McGill, while if they lose, a fourth game will be required to decide the winner.

It would be hard to predict the result of the match to-night. Since the last game U. of M. have been playing great hockey. In Montreal they held the Varsity to a 2-1 score and when they visited the Queen city gave the Toronto sextette their only reverse of the season by winning 9-7. This augurs well for the Frenchmen and their supporters are confidently awaiting the outcome of the battle to-night.

On the other hand the Red and White men have been going great guns. They finished the intercollegiate schedule with a victory from Queen's 5-3 and gave M. A. A. A. a severe trimming Thursday night 7-1. Glennie, who accounted for three tallies in the last game with U. of M., showed he is still going strong by sending the rubber into the nets four times against M. A. A. A. while the rest of the team worked together remarkably well, considering the condition the ice was in.

In any case the game to-night will be a real battle from start to finish and is bound to furnish more than a few thrills. With good support behind them the Red and White have a great chance, so every rooster is urged to turn out and do his part.

The probable line-up will be as follows:

McGill	U. of M.
Goal	Goal
Reid	Lajeunesse
Defence	Defence
Dempsey	Beaubien
Dineen	Poirier
Forwards	Forwards
Glennie	Lapointe
Wyse	Ledue
McGerrigle	Lord
Cooper	Smeaton

As may be seen from yesterday's Daily, when the reporter asked Prof. E. B. Hill of Harvard if he liked jazz, he replied, "I like good jazz as I like good food. Good jazz is America's only contribution to the music to the world." He also referred to the "highbrow" classical music.

But a very different story was told the reporter of Stanford University by the organist of that college.

Young people of today are getting their ideas of musical classics from jazz versions, according to Warren D. Allen, University organist. "Why don't they try to find out what the originals sound like?"

Jazz has its place and may be useful if it opens the way up to real music, is his opinion, but if jazz is thought the end in itself—and here Allen threw up his hands "By the way," he remarked, "during the war kindly-disposed sent 'shell-shocked' patients into convulsions with syncopated jazz."

"I hate the word 'highbrow' said Allen, "because if there is anything that is human and appealing to the many as well as the womanly instincts it is music. The biggest capitalists of industry are often men who are also patrons of music."

He mentioned that Charles Schwab sent the Bethlehem choir of 150 voices on a special train to New York City for a Bach program. George Eastman of the Kodak company, recently gave four millions to the University of Rochester for a school of music, which is now one of the most extensive in the country. The largest organ in the world, according to Allen, is in the Wanamaker store, of Philadelphia, and it attracts thousands. "It has been proven," he continued, "that at the great industrial centers the hands, Glee Club, and choruses are of professional caliber."

"As for the organ as a concert instrument, more people are interested in organ recitals than ever before," declared Allen. "I think one of the difficulties in making the organ more attractive is that it is so far removed, and the performer is out of sight. But the lack of intimacy surely is compensated for by the environment of the Memorial Church."

Allen has given over 400 recitals in his six years as University organist, and several other oratorios each year. "I wish students would make requests for special selections," he said. "Music study develops the personality, satisfies the emotions, and sharpens the intellectual faculties."

RAMSAY AWARD FOR CHEMISTRY YEARLY

Fellowship of \$1,500 for Advanced Research

The Research Council of Canada has decided to give a Ramsay Memorial Fellowship in Chemistry, to be awarded annually.

To commemorate the services which the late Professor Sir William Ramsay rendered to the Science of Chemistry, an International Committee was formed in 1917 to establish a fund to be known as the Ramsay Memorial Fund, the income from which would maintain a number of Fellowships in Chemistry, to be awarded to students who have given evidence of a high capacity for research in the Science of Chemistry. The Research Council of Canada decided to convert one of its Fellowships into a Ramsay Memorial Fellowship to be awarded annually by it, under the auspices of the Ramsay Memorial Committee.

In order to be eligible for this Fellowship, a candidate must have already successfully completed researches on chemical problem of importance. The holder of this Fellowship will carry on researches in some Chemical Laboratory in Great Britain, selected with the approval of the Research Council of Canada.

A candidate who has held the Fellowship for a year is eligible for re-appointment for another year if, in the opinion of the Council, the results of the research work carried out by him during the first year of his tenure of the Fellowship are of exceptional merit.

The amount of the Fellowship is \$1,500.

Application should be made on or before June 1st, directly to the Research Council of Canada, Ottawa, S. P. Eagleson, secretary.

SCIENCE OFFICERS TO BE ELECTED

Nominations for Science Undergrad. Society Now in

The following is a list of those nominated for office in the Science Undergraduate Society for the coming year, together with a list of their nominators. The elections are to take place Monday, March 3rd. The polling will be from 9 a.m. to 2 p.m. Judging by past records, a large vote will be polled. All these men are well known in the faculty and competition will be keen.

We, the undersigned, hereby nominate Clear, M. Anson for president of the Science Undergraduate Society for 1924-25:

R. S. Logan, W. A. T. Gilmour, Howard D. Hyman, G. M. Merritt, Robert F. Ogilvy, A. O. Leslie, C. H. McNaughton, L. McGillis, H. M. Williams, E. S. Cope.

We the undersigned nominate Art, Abbott for President of the Science Undergraduate Society for 1924-25:

J. W. Murray, Donald C. Gauthier, W. Stevens, W. W. Graham, Chas. E. Napier, D. F. Smith, J. Wood, A. A. Bickford, J. J. H. Miller, R. E. Dingman, J. S. Shotwell, John Gordon, D. C. McDermid, J. P. Cartlett.

We the undersigned nominate Gordon M. Connor as Vice-President of the Science Undergraduate Society for 1924-25:

John Gordon, A. C. Abbott, J. P. Bartlett, W. A. T. Gilmour, G. M. Warren, Harry C. Johnson, W. Stevens, W. P. Malone, A. A. Bickford, J. J. H. Miller.

We the undersigned nominate Gerald Merritt as Vice-President of the Science Undergraduate Society for 1924-25:

Lloyd B. Almond, T. Willard Mace, H. E. Smith, A. L. Gravel, G. W. Moore, H. B. Tatley, J. F. Rutherford, P. S. Hunter, C. H. Pigot, J. G. Wright.

We the undersigned hereby nominate David Boyd for Secretary of the Science Undergraduate Society for 1924-25:

Henry T. Airey, J. Milligan, J. D. Converse, P. G. Dansford, E. M. Hutchings, J. Webster, W. B. Ross, Jas. G. Hearn, Bert. Bauman, J. M. Young.

We the undersigned nominate Lloyd B. Almond for Secretary of the Science Undergraduate Society for 1924-25:

H. M. Williams, T. W. Mace, G. W. Moore, W. H. Kyle, C. M. Anson, E. S. Cope, A. O. McGill, G. M. Warren, H. J. Lacey, David G. Nicholson.

We the undersigned nominate M. H. Moore for Secretary of the Science Undergraduate Society for 1924-25:

C. Scofield, J. R. Scanlon, J. E. Rutherford, N. H. McKenzie, P. E. Whiter, H. I. Milligan, Leigh W. Bladen, Ernest Ridgwell, D. O. Bremner, Jules Archambault.

We the undersigned nominate Gordon W. Moore as Secretary of the Science Undergraduate Society:

J. H. Donnelly, Meredith Dixon, Hugh R. Mahoney, A. E. Manyille, J. G. Henderson, P. F. Cooper, L. Crepeau, Chas. S. Dell, R. Weir, H. B. Tatley, W. H. Kyle.

VARSIITY AND McGILL TEAM AT ANNAPOLIS

Strong Canadian Squad to Meet U.S. Boxers

TONIGHT

Only Two Canadians Victorious in Meet Last Year

The Canadian Intercollegiate Boxing team composed of men from both Varsity and McGill meet to-day the representatives of the United States Naval Academy at latter's college in Annapolis, Maryland. The only McGill men on the team are Snow, the 135 lb. McGill champion and F. A. MacNaughton, manager of the McGill Boxing team who goes to the meet in the capacity of manager of the intercollegiate team. The seven other boxers on the Canadian team are all Varsity men and the team's coach is the Varsity coach. The McGill men left Thursday night for Toronto where they join the Varsity quota and will then proceed to Baltimore. They will arrive at Baltimore at 5.15 this morning and will then set out on the last lap of their journey to Annapolis which is but a short distance from Baltimore.

Judging from previous performances of the Navy squad of boxers, the Canadian mitt-artists are up against a sturdy lot of eleven fighters. Last year only two of the seven Canadian entries succeeded in winning their bouts. Varsity and McGill divided the honors with one win apiece.

The Canadian entry in the 115 lb. class is Hubbard of Toronto who won the decision by a shade from Hanna in the finals of the Assault-at-Arms. Last year, Wilson of McGill was beaten by the Navy man. Although Wilson put up a hard fight, Gordie Gray, the classy 125 lb. Varsity boxer represents the Canadians this year. Snow, last year's representative in this class, is the Canadian entry in the 135 lb. class this year. Both Snow and Shackell the 125 and 132 lb. Canadian entries were beaten last year.

Cates of Varsity, who gave Merritt such a game battle in the Assault-at-Arms, this year represents the Canadian team in the 145 lb. class. Cates is a game fighter and should show up well in Annapolis. Last year "Windy" Brewer, the rugged intercollegiate champion, was one of the two Canadians who won their bouts. Probably the best boxer of the Canadian team is Black of the 160 lb. champion class who gave such a great exhibition of ring generalship and boxing ability in his bout in the Assault-at-Arms two weeks ago. Black is one of the brightest hopes of the Canadian team.

Shute of Varsity who scored a knockout over Abinovich, last year's 160 lb. Canadian representative, here recently, is the 175 lb. mitt artist of the Canadian team. Shute gave a good performance which augurs well for his success at Annapolis. Joe Mahon again represents the Canadian colleges this year in the heavyweight division and it is hoped he will repeat his performance of last year when he won the decision from the Navy boxer.

The Canadian Intercollegiate team appears to be stronger this year than last, because it is composed for the most part of veteran boxers who have built up a good reputation in past performances. However, if the Navy leather-pushers live up to their record in the past the Canadians will have their work cut out when they cross mitts with the sailors to-night.

FAMOUS MAN TO LECTURE ON GREECE

(Continued from Page 1)

Until about fifty years ago, absolutely nothing was known of the predecessors of the Greeks in the Aegean world, yet to these we owe a great deal of our modern civilization. In the "seventies" Schliemann commenced excavations at Troy. Starting operations in Greece, he excavated a castle at Mycenae. Magnificent vessels and ornaments of gold were found in the stone tomb chambers. In 1900 Sir Arthur Evans, an archaeologist of great fame, made the startling discovery of a palace city at Cnossus. Mr. Wace has been following up their work, adding to the meagre facts we possess of this wonderful period of the Early World.

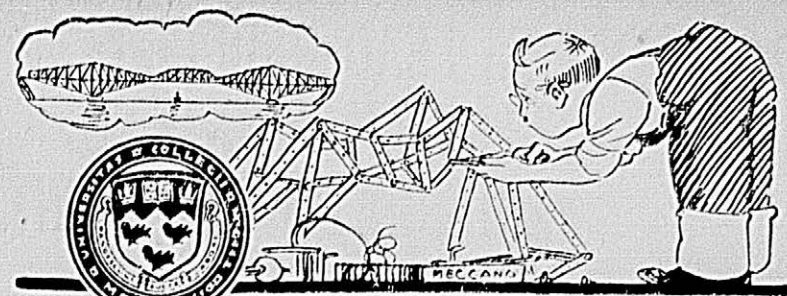

We, the following nominate T. W. Mace for Treasurer of the Science Undergraduate Society for 1924-25:

H. M. Williams, H. B. Tatley, J. P. Rutherford, A. O. Leslie, B. K. Boulton, E. S. Cope, L. McGillis, C. F. Phipps, G. M. Warren, H. J. Lacey.

We, the undersigned nominate Louis Crepeau for Treasurer of the Science Undergraduate Society for 1924-25:

L. Belleau, Jules Archambault, Gordon Baxter, H. Gregory, J. G. Allison, C. Scofield, Ernest Ridgwell, A. Lacey, Philip Hughes, J. F. Houghton.

The following offices were filled by acclamation:
Assistant Secretary—Trevor Kerr.
Reporter—J. L. Fitch.

APPLIED SCIENCE

TORONTO VARSITY PLAYS NEW ROLE

College Turns Into Hollywood for a Day

The following article is taken from "The Varsity" which might be interesting to McGill students.

Last week under the auspices of Mr. Dunlop, of the Department of University Extension, the Ontario Government Bureau of Motion Pictures took a series of films to be shown as educational matter throughout the province. The picture is to be entitled "Scientists in the Making," and depicts scenes from the various laboratories at the University.

The first series was taken in the Mechanical Building, and started in the Hydraulic Laboratory. A few feet were then made of the interior workings of the Aerodynamics Laboratory.

At the Mill, pictures were taken showing students in the act of separating and crushing the metal from the ore. The scene quickly changes to the Electrical Laboratory and thence to the Test of Material Laboratory. Here the spectator will see the process of the crushing of tile, the stretching of an iron bar and the breaking of a piece of wood.

The most important item taken in the Physics Building, however, was a real showing Professor MacLennan and Mr. Shrum at work at the liquefaction of helium. Several of the steps were filmed and the more prominent apparatus used.

Continuing in the Physics Building, pictures were taken showing the big Spark Coil, the famous compressor, and what was most interesting, the freezing of a fresh flower by liquid air.

Again the operators moved across the street to the Engineering, where several films of some of the classes were taken, notably the class in mechanical drawing and the photometric class. They did not tarry long here, but went across the way to the Medical Building where some interesting pictures of the circulation and the respiration were made. After this, the operators called it a day.

These pictures will be shown first in Toronto and then will be distributed by the government all over the province.

ALLEN CHAMPIONS CLASSICAL MUSIC

Stanford Organist Gives Opinion on Jazz

As may be seen from yesterday's Daily, when the reporter asked Prof. E. B. Hill of Harvard if he liked jazz, he replied, "I like good jazz as I like good food. Good jazz is America's only contribution to the music to the world." He also referred to the "highbrow" classical music.

But a very different story was told the reporter of Stanford University by the organist of that college.

Young people of today are getting their ideas of musical classics from jazz versions, according to Warren D. Allen, University organist. "Why don't they try to find out what the originals sound like?"

Jazz has its place and may be useful if it opens the way up to real music, is his opinion, but if jazz is thought the end in itself—and here Allen threw up his hands "By the way," he remarked, "during the war kindly-disposed sent 'shell-shocked' patients into convulsions with syncopated jazz."

"I hate the word 'highbrow' said Allen, "because if there is anything that is human and appealing to the many as well as the womanly instincts it is music. The biggest capitalists of industry are often men who are also patrons of music."

He mentioned that Charles Schwab sent the Bethlehem choir of 150 voices on a special train to New York City for a Bach program. George Eastman of the Kodak company, recently gave four millions to the University of Rochester for a school of music, which is now one of the most extensive in the country. The largest organ in the world, according to Allen, is in the Wanamaker store, of Philadelphia, and it attracts thousands. "It has been proven," he continued, "that at the great industrial centers the hands, Glee Club, and choruses are of professional caliber."

"As for the organ as a concert instrument, more people are interested in organ recitals than ever before," declared Allen. "I think one of the difficulties in making the organ more attractive is that it is so far removed, and the performer is out of sight. But the lack of intimacy surely is compensated for by the environment of the Memorial Church."

MACCABAEANS HAVE LADIES' PROGRAMME

The next meeting of the Maccabean Circle will be held at the McGill Union to-morrow afternoon, March 2nd. The complete programme will be carried out by the ladies.

"The Jew in English Literature" will be the subject of a symposium in which the Misses Ratner, Lazorovitch and Tarshis will participate. Miss Ratner, Arts '26, will deal with those Jewish characters which have been favorably portrayed in English literature; Miss Lazorovitch Arts '27 with those unfavorably treated, while Miss Tarshis B.A. Med. '26 will treat of the Jew as depicted by Jewish authors writing in English. Miss Frances Levickoff Arts '26, will give some recitations and Miss Sadie Shapiro will render a piano solo.

The debaters for the McGill-Toronto Menorah debate will be chosen. This is the first time that the lady members of the circle have complete control of the programme, and the meeting should prove both unique and interesting.

compensated for by the environment of the Memorial Church.

Allen has given over 400 recitals in his six years as University organist, and several other oratorios each year. "I wish students would make requests for special selections," he said. "Music study develops the personality, satisfies the emotions, and sharpens the intellectual faculties."

RAMSAY AWARD FOR CHEMISTRY YEARLY

Fellowship of \$1,500 for Advanced Research

The Research Council of Canada has decided to give a Ramsay Memorial Fellowship in Chemistry, to be awarded annually.

To commemorate the services which the late Professor Sir William Ramsay rendered to the Science of Chemistry, an International Committee was formed in 1917 to establish a fund to be known as the Ramsay Memorial Fund, the income from which would maintain a number of Fellowships in Chemistry, to be awarded to students who have given evidence of a high capacity for research in the Science of Chemistry. The Research Council of Canada decided to convert one of its Fellowships into a Ramsay Memorial Fellowship to be awarded annually by it, under the auspices of the Ramsay Memorial Committee.

In order to be eligible for this Fellowship, a candidate must have already successfully completed researches on chemical problem of importance. The holder of this Fellowship will carry on researches in some Chemical Laboratory in Great Britain, selected with the approval of the Research Council of Canada.

A candidate who has held the Fellowship for a year is eligible for re-appointment for another year if, in the opinion of the Council, the results of the research work carried out by him during the first year of his tenure of the Fellowship are of exceptional merit.

The amount of the Fellowship is \$1,500.

Application should be made on or before June 1st, directly to the Research Council of Canada, Ottawa, S. P. Bagleson, secretary.

SCIENCE OFFICERS TO BE ELECTED

Nominations for Science Undergrad. Society Now in

The following is a list of those nominated for office in the Science Undergraduate Society for the coming year, together with a list of their nominators. The elections are to take place Monday, March 3rd. The polling will be from 9 a.m. to 2 p.m. Judging by past records, a large vote will be polled. All these men are well known in the faculty and competition will be keen.

We, the undersigned, hereby nominate Clem. M. Anson for president of the Science Undergraduate Society for 1924-25:

R. S. Logan, W. A. T. Gilmour, Howard D. Hyman, G. M. Merritt, Robert P. Ogilvy, A. O. Leslie, C. H. McNaughton, L. McGillis, H. M. Williams, B. S. Cope.

We the undersigned nominate Art. Abbott for President of the Science Undergraduate Society for 1924-25: J. W. Murray, Donald C. Gauthier, W. Stevens, W. W. Graham, Chas. E. Napier, D. P. Smith, J. Wood, A. A. Bickford, J. J. H. Miller, R. E. Dingman, J. S. S. Shotwell, John Gordon, D. C. McDiarmid, J. P. Cartlett.

We the undersigned nominate Gordon M. Connor as Vice-President of the Science Undergraduate Society for 1924-25:

John Gordon, A. C. Abbott, J. P. Bartlett, W. A. T. Gilmour, G. M. Warren, Harry C. Johnson, W. Stevens, W. P. Malone, A. A. Bickford, J. J. H. Miller.

We the undersigned nominate Gerald Merritt as Vice-President of the Science Undergraduate Society for 1924-25:

Lloyd B. Almond, P. Willard Mace, H. E. Smith, A. L. Gravel, G. W. Moore, H. B. Tatley, J. F. Rutherford, P. S. Hunter, C. H. Pigot, J. G. Wright.

We the undersigned hereby nominate David Boyd for Secretary of the Science Undergraduate Society for 1924-25:

Henry T. Airey, J. Milligan, J. D. Converse, P. G. Danford, E. M. Hutchings, J. Webster, W. B. Ross, Jas. G. Hearn, Bert. Bauman, J. M. Young.

We the undersigned nominate Lloyd B. Almond for Secretary of the Science Undergraduate Society for 1924-25:

H. M. Williams, T. W. Mace, G. W. Moore, W. H. Kyle, C. M. Anson, E. S. Cope, A. O. McGill, G. M. Warren, H. J. Lacey, David G. Nicholson.

We the undersigned nominate M. H. Moore for Secretary of the Science Undergraduate Society for 1924-25:

C. Seofield, J. R. Scanlon, J. F. Rutherford, N. H. McKenzie, P. E. Whiter, H. I. Mulligan, Leigh W. Bladon, Ernest Ridgwell, D. O. Benamer, Jules Archambault.

We the undersigned nominate Gordon W. Moore as Secretary of the Science Undergraduate Society:

J. H. Donnelly, Meredith Dixon, Hugh B. Mahoney, A. E. Manville, J. G. Henderson, D. P. Cooper, L. Crepeau, Chas. S. Dell, B. Weir, H. B. Tatley, W. H. Airey.

VARSIITY AND McGILL TEAM AT ANNAPOLIS

Strong Canadian Squad to Meet U.S. Boxers

TONIGHT

Only Two Canadians Victorious in Meet Last Year

The Canadian Intercollegiate Boxing team composed of men from both Varsity and McGill meet to-day the representatives of the United States Naval Academy at latter's college in Annapolis, Maryland. The only McGill men on the team are Snow, the 135 lb. McGill champion and F. A. MacNaughton, manager of the McGill Boxing team who goes to the meet in the capacity of manager of the intercollegiate team. The seven other boxers on the Canadian team are all Varsity men and the team's coach is the Varsity coach. The McGill men left Thursday night for Toronto where they join the Varsity quota and will then proceed to Baltimore. They will arrive at Baltimore at 9.15 this morning and will then set out on the last lap of their journey to Annapolis which is but a short distance from Baltimore.

Judging from previous performance of the Navy squad of boxers, the Canadian mitt-artists are up against a sturdy lot of clever fighters. Last year only two of the seven Canadian entries succeeded in winning their bouts. Varsity and McGill divided the honors with one win apiece.

The Canadian entry in the 115 lb. class is Hubbard of Toronto who won the decision by a shade from Hanna in the finals of the Assault-at-Arms. Last year, Wilson of McGill was beaten by the Navy man. Although Wilson put up a hard fight, Gordie Gray, the classy 125 lb. Varsity boxer represents the Canadians this year. Snow, last year's representative in this class, is the Canadian entry in the 135 lb. class this year. Both Snow and Shackell the 125 and 135 lb. Canadian entries were beaten last year.

Cates of Varsity, who gave Merritt such a game battle in the Assault-at-Arms, this year represents the Canadian team in the 145 lb. class. Cates is a game fighter and should show up well in Annapolis. Last year "Windy" Brewer, the rugged intercollegiate champion, was one of the two Canadians who won their bouts. Probably the best boxer of the Canadian team is Black of the 160 lb. champion class who gave such a great exhibition of ring generalship and boxing ability in his bout in the Assault-at-Arms two weeks ago. Black is one of the brightest hopes of the Canadian team.

Shute of Varsity who scored a knockout over Abdnovitch, last year's 160 lb. Canadian representative, here recently, is the 175 lb. mitt artist of the Canadian team. Shute gave a good performance which augurs well for his success at Annapolis. Joe Mahon again represents the Canadian colleges this year in the heavy-weight division and it is hoped he will repeat his performance of last year when he won the decision from the Navy boxer.

The Canadian Intercollegiate team appears to be stronger this year than last, because it is composed for the most part of veteran boxers who have built up a good reputation in past performances. However, if the Navy leather-pushers live up to their record in the past the Canadians will have their work cut out when they cross mitts with the sailors to-night.

FAMOUS MAN TO LECTURE ON GREECE

(Continued from Page 1)

Until about fifty years ago, absolutely nothing was known of the predecessors of the Greeks in the Aegean world, yet to these we owe a great deal of our modern civilization. In the "seventies" Schliemann commenced excavations at Troy. Starting operations in Greece, he excavated a castle at Mycenae. Magnificent vessels and ornaments of gold were found in the stone tomb chambers. In 1900 Sir Arthur Evans, an archaeologist of great fame, made the startling discovery of a palace city at Cnossus. Mr. Wace has been following up their work, adding to the meagre facts we possess of this wonderful period of the Early World.

We, the following nominate T. W. Mace for Treasurer of the Science Undergraduate Society for 1924-25:

H. M. Williams, H. B. Tatley, J. F. Rutherford, A. O. Leslie, B. K. Boulton, E. S. Cope, L. McGillis, C. F. Phipps, G. M. Warren, H. J. Lacey.

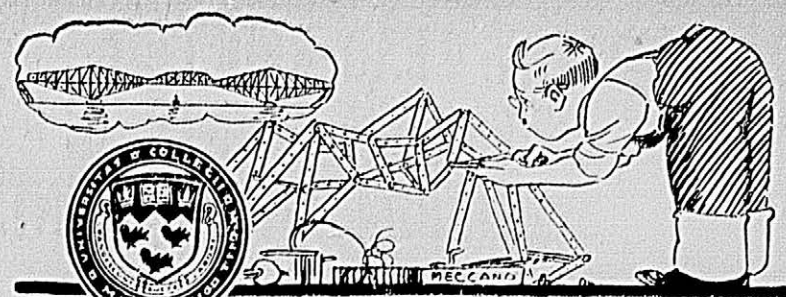

We, the undersigned nominate Louis Crepeau for Treasurer of the Science Undergraduate Society for 1924-25:

L. Belleau, Jules Archambault, Gordon Baxter, H. Gregory, J. G. Allison, C. Seofield, Ernest Ridgwell, A. Latier, Philip Hughes, J. F. Hinchman.

The following offices were filled by acclamation:

Assistant Secretary: Trevor Kerr.

Reporter: J. L. Fitch.

TORONTO VARSITY PLAYS NEW ROLE

College Turns Into Hollywood for a Day

The following article is taken from "The Varsity" which might be interesting to McGill students.

Last week under the auspices of Mr. Dunlop, of the Department of University Extension, the Ontario Government Bureau of Motion Pictures took a series of films to be shown as educational matter throughout the province. The picture is to be entitled "Scientists in the Making," and depicts scenes from the various laboratories at the University.

The first series was taken in the Mechanical Building, and started in the Hydraulic Laboratory. A few feet were then made of the interior workings of the Aerodynamics Laboratory.

At the Mill, pictures were taken showing students in the act of separating and crushing the metal from the ore. The scene quickly changes to the Electrical Laboratory and thence to the Test of Material Laboratory. Here the spectator will see the process of the crushing of tile, the stretching of an iron bar and the breaking of a piece of wood.

The most important item taken in the Physics Building, however, was a reel showing Professor MacLennan and Mr. Shrum at work at the liquefaction of helium. Several of the steps were filmed and the more prominent apparatus used.

Continuing in the Physics Building, pictures were taken showing the big Spark Coil, the famous compressor, and what was most interesting, the freezing of a fresh flower by liquid air.

Again the operators moved across the street to the Engineering, where several films of some of the classes were taken, notably the class in mechanical drawing and the photometric class. They did not tarry long here, but went across the way to the Medical Building where some interesting pictures of the circulation and the respiration were made. After this, the operators called it a day.

These pictures will be shown first in Toronto and then will be distributed by the government all over the province.

ALLEN CHAMPIONS CLASSICAL MUSIC

Stanford Organist Gives Opinion on Jazz

As may be seen from yesterday's Daily, when the reporter asked Prof. E. B. Hill of Harvard if he liked jazz, he replied, "I like good jazz as I like good food. Good jazz is America's only contribution to the music to the world." He also referred to the "highbrow" classical music.

But a very different story was told the reporter of Stanford University by the organist of that college.

Young people of today are getting their ideas of musical classics from jazz versions, according to Warren D. Allen, University organist. "Why don't they try to find out what the originals sound like?"

Jazz has its place and may be useful if it opens the way up to real music, is his opinion, but if jazz is thought the end in itself—and here Allen threw up his hands "By the way," he remarked, "during the war kindly-disposed sent shell-shocked patients into convulsions with syncopated jazz."

"I hate the word 'highbrow,'" said Allen, "because if there is anything that is human and appealing to the manly as well as the womanly instincts it is music. The biggest captives of industry are often men who are also patrons of music."

He mentioned that Charles Schwab sent the Bethlehem choir of 150 voices on a special train to New York City for a Bach program. George Eastman of the Kodak company, recently gave four millions to the University of Rochester for a school of music, which is now one of the most extensive in the country. The largest organ in the world, according to Allen, is in the Wanamaker store, of Philadelphia, and it attracts thousands. "It has been proven," he continued, "that at the great industrial centers the hands, Glee Club, and choruses are of professional caliber."

"As for the organ as a concert instrument, more people are interested in organ recitals than ever before," declared Allen. "I think one of the difficulties in making the organ more attractive is that it is so far removed, and the performer is out of sight. But the lack of intimacy surely is com-

INSPIRING ADDRESS BY PROMINENT LAWYER ON POLITICAL SINCERITY

Those few who turned out yesterday afternoon at the Canadian Club were treated to one of the best addresses this season by Mr. R. L. Calder K.C., Senior Crown Prosecutor of Montreal. Mr. Calder's subject was "Political Sincerity," and all those who heard him could not help feeling that this doctrine ought to be universally dealt with.

Seeing that there were so few present and saying that he always felt more at home on the same level as his audience, Mr. Calder spoke from the floor instead of from the platform. He deplored the fact, which cannot be denied, that democracy has failed. It is indeed depressing that the catalogue of every library should include such books as Godkin's "Unforeseen Problems of Democracy." Democracy is perfect in theory, but in practice it has not been successful. It is the duty of all to examine parliamentary government, to see if they can find a solution to the present difficulties.

Since popular government began, barely two centuries have elapsed. The people had their first say in the time of George I, but we must realize that modern parliamentary government is only in its infancy, for it was only five years ago, that universal suffrage was established in England. A member of parliament represents a majority this being the only conceivable method of popular representation. A man, if he wishes to bring about a reform, must first obtain favourable public opinion and, possessed with this, he allies himself to some party, and is elected to parliament. He is bound to support the reforms for which he was elected, for, if he does not, he will inevitably be punished by an adverse vote at the next election.

This theory, however, does not work because the method of choice is wrong. The people of Canada are not interested in politics, they do not interest themselves in political debates, there are swayed by trivial and unimportant catch or preconceived decision. There things. The decision at elections is a few electors who think of political problems and analyse them to any extent. The effect of all these faults has been the failure of democracy.

In order to carry on the life of a state, every man must take his part, however small this part may be. If this duty is neglected, the first seed of destruction is sown. But many neglect this duty and it is sad to say that politicians take advantage of his. Bribery and corruption result. As we all know, votes are stolen, and it may be rightly said that he who steals the vote is a better citizen than

the man that does not exercise his vote, as the former is taking at least a real interest in the government of his country.

Fascism and Bolshevism are the direct results of this. Some say that we need the authoritative kind of government with a dictator at its head while others believe in government by the representatives of the various trades, which would eventually bring us back to the early state where tribes were the unit of civic life. Both are the death and poison of parliamentary government.

The speaker stated that he preferred fixed parties with a deal of tradition behind them but, the elected only, should be divided into parties, this being necessary for a stable government. This should not be so in the case of the elector, but it is actually what happens. As it is, a man is born a Conservative, a Liberal or a Progressive, while a change of party is considered almost a disgrace. This state of affairs may be likened to that of a jurymen that enters the box fully determined to pronounce the accused guilty no matter what anybody is able to prove to the contrary. This is the outstanding cause of the modern democratic government. This is emphasized by the well-known fact that political parties are scared by independent voters and any increase in their ranks will tend to increase the efficiency of the government.

The three-party system, now functioning in England and Canada, is very similar to the three-cornered duel in "Midshipman Easy." Each party is afraid to face a general election. Hence there is no progress.

People must be educated to adherence to principle. The state of affairs shows just the opposite, however. In Canada the people are allowing their votes to be captured by everything but the right bait. Lavish amusement and feigned interest, on the part of the politician, attract the public while their political merits remain unquestioned.

In concluding, Mr. Calder said that he believed that it was not the natural resources of Sparta and Rome that made them so powerful. It was the character and patriotism of their citizens, combined with their excellent government, that gave them such outstanding positions in the history of the world. Trained university men must strive for good government, elected by intelligent people, voting with sincerity.

The speaker was vigorously applauded and Lawrence Tombs proposed the vote of thanks, which was seconded by A. L. Morris.

FINAL GAME IN BEAUBIEN CUP SERIES

U. of M. Clash With Red and White at Arena
MCGILL LEAD
Both Teams Show Good Hockey in Late Games

One of the most important hockey games of the season is due to take place to-night in the Mount Royal Arena at 8.15 o'clock, when the winner of the Beaubien Cup will be decided. As everyone knows this cup is presented for competition between McGill University and the University of Montreal. The cup is awarded to the team winning the best of three games, of which the game to-night is the third.

The first time these teams met the game was a draw, the score being four all after three periods overtime of gruelling play. This game was the closest of the season and was a fairly good exhibition of hockey. In the second game a vastly improved McGill team overcame the U. of M. sextette to the tune of five to one, thus giving them a good lead for the cup. If the Red and White men win or draw in the game to-night, the trophy will come to McGill, while if they lose, a fourth game will be required to decide the winner.

It would be hard to predict the result of the match to-night. Since the last game U. of M. have been playing great hockey. In Montreal they held the Varsity to a 2-1 score and when they visited the Queen city gave the Toronto sextette their only reverse of the season by winning 9-7. This augurs well for the Frenchmen and their supporters are confidently awaiting the outcome of the battle to-night.

On the other hand the Red and White men have been going great guns. They finished the intercollegiate schedule with a victory from Queen's 5-3 and gave M. A. A. a severe trimming Thursday night 7-1. Glennie, who accounted for three tumbles in the last game with U. of M., showed he is still going strong by sending the rubber into the nets four times against M. A. A. while the rest of the team worked together remarkably well, considering the condition the ice was in.

In any case the game to-night will be a real battle from start to finish and is bound to furnish more than a few thrills. With good support behind them the Red and White have a great chance, so every rooster is urged to turn out and do his part.

The probable line-up will be as follows:

McGill	Goal	U. of M.
Reid	Goal	Lajeunesse
Dempsey	Defense	Beaubien
Dineen	Defense	Poirier
Glennie	Forwards	Lapointe
Wyse	Forwards	Leduc
McGerrigle	Forwards	Lord
Cooper	Forwards	Smeaton

Cooper Smeaton will referee and is sure to keep the game well in hand.

RAMSAY AWARD FOR CHEMISTRY YEARLY

Fellowship of \$1,500 for Advanced Research

The Research Council of Canada has decided to give a Ramsay Memorial Fellowship in Chemistry, to be awarded annually.

To commemorate the services which the late Professor Sir William Ramsay rendered to the Science of Chemistry, an International Committee was formed in 1917 to establish a fund to be known as the Ramsay Memorial Fund, the income from which would maintain a number of Fellowships in Chemistry, to be awarded to students who have given evidence of a high capacity for research in the Science of Chemistry. The Research Council of Canada decided to convert one of its Fellowships into a Ramsay Memorial Fellowship to be awarded annually by it, under the auspices of the Ramsay Memorial Committee.

In order to be eligible for this Fellowship, a candidate must have already successfully completed researches on chemical problem of importance. The holder of this Fellowship will carry on researches in some Chemical Laboratory in Great Britain, selected with the approval of the Research Council of Canada.

A candidate who has held the Fellowship for a year is eligible for re-appointment for another year if, in the opinion of the Council, the results of the research work carried out by him during the first year of his tenure of the Fellowship are of exceptional merit.

The amount of the Fellowship is \$1,500.

Application should be made on or before June 1st, directly to the Research Council of Canada, Ottawa, S. P. Pagleson, secretary.

ALLEN CHAMPIONS CLASSICAL MUSIC

Stanford Organist Gives Opinion on Jazz

As may be seen from yesterday's Daily, when the reporter asked Prof. E. B. Hill of Harvard if he liked jazz, he replied, "I like good jazz as I like good food. Good jazz is America's only contribution to the music to the world." He also referred to the "highbrow" classical music.

But a very different story was told the reporter of Stanford University by the organist of that college.

Young people of today are getting their ideas of musical classics from jazz versions, according to Warren D. Allen, University organist. "Why don't they try to find out what the originals sound like?"

Jazz has its place and may be useful if it opens the way up to real music, is his opinion, but if jazz is thought the end in itself—and here Allen threw up his hands "By the way," he remarked, "during the war kindly-disposed sent shell-shocked patients into convulsions with syncopated jazz."

"I hate the word 'highbrow,'" said Allen, "because if there is anything that is human and appealing to the mass as well as the womanly instincts it is music. The biggest capitalists of industry are often men who are also patrons of music."

He mentioned that Charles Schwab sent the Bethlehem choir of 150 voices on a special train to New York City for a Bach program. George Eastman of the Kodak company, recently gave four millions to the University of Rochester for a school of music, which is now one of the most extensive in the country. The largest organ in the world, according to Allen, is in the Wanamaker store, of Philadelphia, and it attracts thousands. "It has been proven," he continued, "that at the great industrial centers the hands, Glee Club, and choruses are of professional caliber."

"As for the organ as a concert instrument, more people are interested in organ recitals than ever before," declared Allen. "I think one of the difficulties in making the organ more attractive is that it is so far removed, and the performer is out of sight. But the lack of intimacy surely is compensated for by the environment of the Memorial Church."

Allen has given over 400 recitals in his six years as University organist, and several other oratorios each year. "I wish students would make requests for special selections," he said. "Music study develops the personality, satisfies the emotions, and sharpens the intellectual faculties."

MACCABAEANS HAVE LADIES' PROGRAMME

The next meeting of the Maccabaeans Circle will be held at the McGill Union to-morrow afternoon, March 2nd, the complete programme will be carried out by the ladies.

"The Jew in English Literature" will be the subject of a symposium in which the Misses Ratner, Lazorovitch and Tarshis will participate. Miss Ratner, Arts '26, will deal with those Jewish characters which have been favorably portrayed in English Literature; Miss Lazorovitch Arts '27 with those unfavorably treated, while Miss Tarshis B.A. Med. '26 will treat of the Jew as depicted by Jewish authors writing in English. Miss Frances Levkoff Arts '26, will give some recitations and Miss Sadie Shapiro will render a piano solo.

The debaters for the McGill-Toronto Menorah debate will be chosen. This is the first time that the lady members of the circle have complete control of the programme, and the meeting should prove both unique and interesting.
